one of the best games i have played.very retro and arcadey.pls buy it.it is very worth it.. Fast and easy game. Take approximately 50 minutes to complete and there are not many bugs ( there are some after the last level is finished ).

Tho, I would love to see better description on the Achievements and how to acquire them as I am currently stuck on the Smashed! achievement as last one.. I understand the concept of the game. But isn't fun.

The background always rotating ... always irritating!

No zoom in or out.

No sensation of, definitively, destroy a large ship. That just disappear.

And ... the pattern of bullets and secondary enemies is too basic ...

. what a joke dont buy its realy old school call of duty. It's okay, pretty difficult game.. Very fun game. I beat it in the first week I had it and was a little sad as I didn't think that this had the replay value I was seeking. So myself and many others posted on the forums that there needed to be a hardcore(permadeath) mode. What happens a week or two later? Hardcore more. These devs post updates\ patches every few days and they aren't small pointless patches. It is very obvious that they care about there game\baby and the game just keeps getting better and better. Buy this game, it's great now and I promise that you will get patch upon patch that make the game feel brand new each time. Great game, great devs.. This is an excellent version of the boardgame, which is itself a neat concept. A 2 player game, in the vein of classic boardgames like chess or Stratego, with the novelty of bouncing lasers off mirrors on the playing pieces.

As a singleplayer game, Khet 2.0 is very functional. The AI has several difficulty levels, and will scale from the novice to the experienced player nicely. Games are quick, playing out in 5 or 10 minutes.

As a multiplayer game, the problem is that there's almost no-one else playing at any given time. As I write this review, [Steamcharts.com](http://Steamcharts.com) tells me that the peak number of users in the last day for this game stands at FOUR players. If you have friends who'll play this with you, you'll be fine. If you're expecting to be able to find pubbies to get a game, forget it.. So its good, and I a worth while purchase,

But..

1. Description wording (to me) makes this sound like a season pass, so when i heard that videl and jiren were being released i was excited to see them, and i didn't, surprise-surprise. Either way the wording "no less than 8 additional characters" makes it sound like you would get the first dlc characters, and as more release, them as well.

2.This is costly as \u2665\u2665\u2665\u2665, I don't think that I should pay \$35 for 8 characters, and thats it. Like \$35 for the 8 fighters, and early SSB Goku and Vegeta unlock seems a better value. Or even better 8 new fighters, SSB Vegeta and goku, and maybe some like additional story arc for single player or something.

Ultimately this is my opinion, and most of the time nobody bothers to read reviews anyway so if you do let me know on your opinion. First Hitman game I've played, I almost pooped my pants because I heard someone threaten to kill me in my own language.

That aside the game is great, the perfect transition between Silent Assassin and Blood Money.. my pc could not run this with a gtx965 even thoe the graphics look there from a ps2 i was so looking forward to playing this but cant cos my frames are so bad. so if you have anything higher then a gtx965 dont bother buying it you will just end up refunding.

---

I'll write the same thing on this as I wrote for Judgement Silversword - At this price, it literally feels like stealing. I've paid 4x this to play this on Xbox 360 and it's worth every damn penny.

The soundtrack is absolutely FANTASTIC, the gameplay is an evolution of Judgement Silversword, it's great fun without an overly complex scoring hook and just feels amazing to play.

. In short, the "overall" best MX game I've ever played! I raced MX bikes for years and I know what the real thing feels like. Is it perfect? Hell no. Is it the most fun to play of any MX game? In my opinion, yes!!! Buy it.

----- The Good -----

- Physics: though in air physics aren't perfect, the bike feels closest to the real thing of all MX games I've played (yes I've played MX Sim, just not near as fun and as polished as MESX2)
- Cornering; loss of traction and throttle control are critical or you may spin out
- Graphics: best most realistic graphics racing experience ever!
- Presentation: real announcers, fireworks, track deformation, and dynamic weather (in career mode)
- you could race a heat in the rain; then in the main Event have clear skies.. Nice!
- Track Editor: the most feature-rich track editor of any MX game; racing your track online is another story
- Factory bikes!!! No made up bike names; you ride the real thing and all bikes have slight differences but are balanced

----- The Bad -----

In-air Physics: you can move the bike left and right / you can pull out of an endo too easily; this makes the game a little easier and some would argue more fun since you will crash less

- Scrubs/Whips: The whips are semi-free; not as good as other MX games, but they do lower the bike off jumps like real scrubs; this game is more focused on racing rather than Freestyle (tricks are only enabled on finish line last lap)

- Online Custom Tracks: you can not view "Favorite" tracks online; only Most Downloaded or Most Liked; this make playing a newly created track impossible; if this change is made the game replay value will sky rocket!!!. The basic premise of the game is broken.

In real life, satellite missions are planned months, sometimes years ahead of time.

This is to avoid micro-management under time pressure and conflicts in schedule.

Satellite Command is about micro-management under time pressure and conflicts in schedule.

So much for "realistic simulator".

Simply adding a pause button and a rewind feature would make the game much more enjoyable.

Sure you can't rewind IRL, but you have enough time to redo your plans if you're planning months ahead.

EDIT: Can anyone tell me why my review isn't helpful?. A difficult coop VR game where you and a friend stand back-to-back against hordes of enemies. A great game to play, but be ready for some almost unfair enemies with your weak weapons.. It's Fortix. You just can't go wrong with Fortix. Fun little game, a must have.. Numen is a piece of♥♥♥♥♥♥ Some players wrote on forum it is better than Loki or Titan Quest. This is false because Numen gameplay is bad & i fail all time to find equipement at my level at merchants. All item from merchants are +10 level more than me. 2,49 euros but not worth more.. If you enjoy SanctuaryRPG, I see no reason to own this DLC, except of course if you can't find it or don't know that it exists. For some reason, this doesn't show up as a DLC for the main game, so you won't know it's here unless you find the link to this page itself!

Because of this, not many people have bought it, and Steam won't activate certain features for it until more people have it. It's a catch-22.

Anyway, I find the content to be very interesting, and a great way to support to the devs. SanctuaryRPG is one of the best little gems I've ever stumbled onto, and the amount of work that went into it is impressive, the devs were constantly upgrading the game for years, making one of the deepest old school RPG experiences in history.. I was looking for a new online poker game. This hit the spot.

Great game, nice interface and intuitive design. good servers and easy to get in and out of games fast.

would recommend to anyone.. I've put more time into this game than any other roguelike aside from dungeon crawl stone soup (which this is very similar to). All around amazing game, especially when it comes to the limitless character customization/skill trees.
